Total				100%	
Procedure		Heat phase A to 70-75 C while mixing. Heat phase B, in a separate beaker, to 70-75C. Add phase B mixture to phase A and homogenize for 3-5 minutes. Add phase C and homogenize for an additional minute. Remove from heat and continue mixing. At 40-45 C, add phase D and E using a side-sweep blade. Continue mixing until exfoliator beads are evenly dispersed. Mix and cool to RT and fill into desired components.
